Creative Commons

Y6 Computing: We are publishers – Topic Vocabulary Mat

Subject Specific Vocabulary	
eBook	A book made available in digital form.
Creative Commons	A licensing scheme where the creator of an original work allows others to use it without seeking further permission, subject to a number of agreed conditions.
ePub	eBook format supported by Apple Books and Google Play Books.
folder	A collection of files in a device or network file system.
image	Picture, diagram, chart or photograph.
Portable Document Format (PDF)	Adobe's open standard for digital versions of print media, supported across different software platforms and devices – typically includes support for commenting and other annotation.
desktop publishing (DTP)	A software and hardware system designed to produce high-quality print (or equivalent digital) media by users without experience in publishing or printing
masthead	The magazine's logo, most often located at the top of the cover.
text	The written word component of (in this case) a magazine.
spread	A set of pages for or from a magazine (usually two) viewed together.

Other information

Real time collaborative editing tools such as Google Docs and Microsoft Word 365 have made it easy for many authors to work together on a shared document at the same time, seeing the changes made by each other. Tools built into this software allow contributions to be identified, with the option for a lead author or editor to accept, modify or reject the changes.

What I've learnt already

Y4:
- Creative Commons is a copyright licensing scheme in which content (like images and video) can be re-used without additional permission.
- Criteria for writing an effective blog post includes:
  - having a specific audience in mind.
  - focusing on a key topic.
  - Writing well, with good spelling and punctuation.
  - Using engaging language.
  - Varying content when writing a series of posts, to keep the blog interesting.

Y3:
- How to create content for a wiki, including writing for a target audience and working collaboratively.

Y1:
- Analogue media is real-world traditional media like paint and paper, and digital media is media on a computer (stored as numbers)

Key Knowledge

- A magazine has a target audience. For a school magazine, this would be parents/carers, other members of the school community and pupils themselves.
- Images in a magazine may be photographs, illustrations or diagrams. It is best to use high-resolution images in a magazine, so that the quality is as good as possible.
- Templates can be used in desktop publishing software. Templates have defined font styles and help to keep the font consistent across many pages.
- Shared folders should be well organised, for example with files named to indicate the content within.
- ePub is an example of an eBook format. Documents can also be exported as PDF files ('Portable Document Format' files) to review a magazine as it enables you to see what a printed magazine would look like and is easy to share online.
- It is important to work respectfully and responsibly when using shared resources. Some corrections and feedback marked onto the magazine might require discussion (e.g. wanting an author to add an extra paragraph to fill space) and others would not (e.g. spelling mistakes).
