Computing- We are Presenters: Y3 Topic Vocabulary Mat

Subject Specific Vocabulary		Relevant Pictures	Exciting Books/Websites	
green screen	A green background that when filmed in front of can be replaced with a different image when edited.		https://www.masterclass.com/articles/how-to-use-a-green-screen#how-to-use-a-green-screen	
presenter	A person who provides information on a specific subject in a video.		https://www.bbc.co.uk/teach/class-clips-video/computing-ks1--ks2-creating-computer-generated-visual-effects/zv2mhbk	
commentary	Spoken words that describe what is happening in a video.	Black History Month		Other Information
output	Data produced by a computer such as a final set of audio and images in the form of a video.	<p>Floella Benjamin (actress, singer, presenter, author, businesswoman, and politician) came to Britain as part of the Windrush generation. She became one of the first children's TV presenters and has worked in television for many years.</p> <p>https://www.bbc.co.uk/creativitydiversity/history/floellabenjamin/</p> 		<p>You can use this Green Screen app on the iPad to replace backgrounds in videos. It's extremely easy</p> 
input	Data supplied to a computer such as recording images and sounds.			
code	Instructions (or a set of rules) that can be understood by a computer.	What I've learnt already		Key Knowledge
algorithm	A sequence of precise instructions or steps (sometimes a set of rules) to achieve a specific objective.	<p>Y2:</p> <ul style="list-style-type: none">Digital devices that take photographs are a common use of information technology beyond school.A pixel is a picture element - one of the small, square dots that make up a digital image.Three techniques for sharp, clear images are: focus (on iPads tap the screen), keep the device steady, and ensure the subject is well lit (naturally or with flash).		<ul style="list-style-type: none">Some common mistakes when shooting video are: camera shake, excessive zooming or panning, not keeping the camera level and pressing stop too soon
editing	The process whereby recorded images and audio are made shorter or changed using a computer program such as Movie Maker.			<ul style="list-style-type: none">Camera techniques include different shots, such as close-ups and cut-aways.
zooming	A camera technique where the camera lens moves closer to the subject creating a close-up shot.			<ul style="list-style-type: none">Recording video and commentary and sourcing images and effects are examples of working with digitised forms of images and sounds (inputs).A Movie Maker project file is a sequence of instructions to assemble media into a final set of output audio and images shown as video.
computer program	An application or software that can be used to perform a specific function such as editing a movie.			<ul style="list-style-type: none">Movie Maker is a computer program so it works according to algorithms written by programmers in computer code.It is important to behave respectfully and responsibly while filming one another.
