Science – Animals: Y1 Topic Vocabulary Mat

Subject Specific Vocabulary		Exciting Books/Websites	Relevant Pictures
amphibian	All amphibians begin their life in water with gills and tails. Examples are frogs and newts. They live part of their lives in water and part on land.	 https://www.bbc.co.uk/bitesize/topics/z6882hv https://www.natgeokids.com/uk/teacher-category/animals/ https://classroom.thenational.academy/units/the-animal-kingdom-3cfa	Mammals  Lion  Elephant  Human Amphibians  Poison Dart Frog  Common Frog  Strawberry Poison Frog  Newt
reptiles	Animals that are cold-blooded. Most lay eggs and their skin is covered with hard, dry scales.		Birds  Hummingbird  Toucan  Parrot Fish  Clown Fish  Sting Ray  Sea Horse
birds	Birds are warm-blooded vertebrates and are the only animals with feathers.		Reptiles  Alligator  Crocodile  Sea Turtle  Tortoise
mammals	Mammals are also warm blooded animals. They breath air and have a backbone.		
carnivore	A carnivore is a meat-eating animal that gets its food from killing other animals.		
herbivore	A herbivore eats plants.		
omnivore	An omnivore eats plants and meat.		
wings	Movable body parts used by birds, bats, or insects to fly. <i>Note: Not all birds can fly, such as penguins, which use their wings to swim.</i>	What I've Learnt Already EYFS: <ul style="list-style-type: none"> We have learnt about different habitats and the animals that live in these habitats, linking our understanding to why different animals are found in different countries. We have explored the natural world, making observations and drawing pictures of animals and plants having identified the local habitats and contrasting environments. 	<ul style="list-style-type: none"> I know and can identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals.
feathers	One of the soft and light parts of a bird that grows from the skin and covers the body.		<ul style="list-style-type: none"> I know and can identify and name a variety of common animals that are carnivores, herbivores and omnivores.
vertebrates	An animal that has a skeleton with a backbone inside its body.		
invertebrates	An animal that does not have a backbone or skeleton inside its body.		<p>I can identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</p>
