- 12. Information sharing**
- 13. Monitoring arrangements**
- 14. Links to other policies**

1. Aims

This policy aims to:

- Set out our school's approach to allergy safety, including reducing the risk of exposure and the procedures in place in case of allergic reaction
- Make clear how our school supports pupils with allergies to ensure their wellbeing and inclusion
- Promote and maintain allergy awareness among the school community

2. Legislation and guidance

This policy is based on the Department for Education (DfE)'s statutory guidance on [allergy safety in schools](#) and [supporting pupils with medical conditions at school](#), the Department of Health and Social Care's guidance on [using emergency adrenaline auto injectors in schools](#) and the following legislation:

- [The Food Information Regulations 2014](#)
- [The Food Information \(Amendment\) \(England\) Regulations 2019](#)

3. Roles and responsibilities

3.1 The governing board

The governing board is responsible for ensuring:

- Risks relating to pupils with allergy are included in the risk register and actively managed
- The school has an allergy safety policy which sets out:
 - Arrangements to reduce the risk of individuals coming into contact with their known allergens
 - Emergency response plans for cases of anaphylaxis

The governing board delegates the day-to-day implementation of this policy to the allergy safety lead.

3.2 Allergy safety lead

The nominated allergy safety lead is Karen Law, Headteacher

She is responsible for:

- Implementing this allergy safety policy
- Reviewing the allergy safety policy at least annually, updating it when needed, and making sure it is published
- Promoting and maintaining allergy awareness across our school community
- Developing and reviewing arrangements for the safe storage and disposal of adrenaline devices (AD)
- Ensuring:
 - All allergy information is up to date and readily available to relevant members of staff
 - All pupils who require support with allergies have an up-to-date individual healthcare plan (IHP)
 - All pupils with a known food or insect sting allergy have up-to-date allergy action plans issued by a medical professional
 - All staff receive regular allergy awareness training
 - All staff are aware of the school's policy and procedures regarding allergies
 - Relevant staff are aware of what activities need an allergy risk assessment
 - Serious incidents and 'near misses' relating to allergy safety are recorded and reported as appropriate, and to consider and share with staff:
 - What lessons there are to learn
 - Any potential changes to the medical conditions and/or allergy safety policies and/or to any pupil's IHP

3.3 Headteacher

The Headteacher is also responsible for:

- Deciding (in discussion with the parents/carers and any relevant healthcare professionals) whether a pupil's allergy can be managed through the adjustments made under the school's medical conditions policy or whether an IHP is required to specify arrangements that reflect the pupil's circumstances

3.4

Jane Spanton (Officer Manager) and Carole Spanton (PA to the Headteacher) are responsible for:

- Checking spare AAI's are present and in date on a monthly basis
- Making sure that replacement AAI's are obtained when expiry dates approach

3.5 Teaching and support staff

All teaching and support staff are responsible for:

- Promoting and maintaining allergy awareness among pupils
- Maintaining awareness of our allergy safety policy and procedures
- Being able to recognise the signs of severe allergic reactions and anaphylaxis
- Being aware of specific pupils with allergies in their care
- Reducing the risk to pupils with known allergies coming into contact with known allergens
- Ensuring the wellbeing and inclusion of pupils with allergies
- Reporting any allergic reaction or case of anaphylaxis to the allergy safety lead

3.6 Parents/carers

Parents/carers are responsible for:

- Being aware of our school's allergy safety policy
- Providing the school with up-to-date details of their child's medical needs, dietary requirements, and any history of allergies, reactions and anaphylaxis
- If required, providing their child with 2 in-date adrenaline auto-injectors and any other medication, including inhalers, antihistamine etc., and making sure these are replaced in a timely manner
- Following the school's guidance on food brought in to be shared
- Updating the school on any changes to their child's condition

3.7 Pupils with allergies

If age-appropriate, these pupils are responsible for:

- Being aware of their allergens and the risks they pose
- Understanding how and when to use their AD
- Wearing their allergy lanyards at lunchtime in the dinner hall

3.8 Pupils without allergies

These pupils are responsible for:

- Being aware of allergens and the risk they pose to their peers

Older pupils might also be expected to support their peers and staff in the case of an emergency.

4. Identifying individuals at risk

Allergy is a spectrum of different allergic diseases. Reactions occur when a susceptible person is exposed to something (an “allergen”) they are allergic to. Common allergic conditions include:

- Hay fever (allergic rhinitis), triggered by allergens carried in the air, such as pollen, house dust mite, animal fur/feathers, or mould
- Skin allergies (e.g. eczema, contact dermatitis, contact urticaria/hives) caused by contact with allergens including house dust mite, pollen and substances like nickel, latex and some chemicals
- Food allergy, which can cause symptoms ranging from mild itching in the mouth to “whole body” reactions including anaphylaxis
- Asthma which may be triggered by airborne allergens
- Allergy to insect stings and medicines

4.1 Identifying pupils at risk

We will:

- For new starters, send a form to all parent/carers of pupils after their place at the school has been confirmed, but before their first school year starts, to confirm any allergy the pupil has and whether they carry medication. Where a pupil has a new diagnosis and/or has moved to the school mid-term, we will send a form and put arrangements in place within 2 weeks
- Send a reminder to parents/carers at the start of each year asking them to update their child’s medical information as necessary via Arbor
- We ask that parents/carers proactively inform us by either phone call to the school 020 7254 4014 or an email to admin@williampatten.hackney.sch.uk if their child’s medical needs change during the school year.

4.2 Identifying staff and visitors at risk

We will:

- Ask existing staff to provide details of their allergies and create a staff allergy list
- Ask new staff to provide details of their allergies in advance of their start date
- Routine visitors: At sign-in, ask visitors to indicate whether they have any allergy or medical condition that the school needs to know about for their safety while on site. Make it optional and explain why you are asking.
- Visitors involved in food activities: If a visitor will be eating, preparing, serving or handling food, ask specifically whether they have any food allergies or dietary requirements relevant to the activity.

4.3 Individual healthcare plans (IHP)

Pupils should have an IHP if they:

- Have an allergy which has a functional impact on them in the school environment
- They are at risk of harm as a result of their allergy; and
- Require arrangements which are additional to or different from those made generally

It is not necessary for a pupil to have a formal diagnosis of allergy for them to have an IHP. Healthcare professionals may decide that it is more appropriate to accept that the child shows symptoms, rather than proceeding to a formal diagnosis.

The IHP will set out the additional and/or different arrangements that will be in place for supporting the pupil. The school will make every effort to make sure that arrangements are put in place within 2 weeks, or by the beginning of the relevant term for pupils who are new to our school.

Not all children with an allergy will require an IHP. Some allergies will have little or no impact on the pupil while they are at school, or pose no risk to the pupil. Some allergies will not require arrangements which are additional to or different from those made generally.

The Headteacher is responsible for deciding (in discussion with the parents/carers and any relevant healthcare professionals) whether a pupil’s allergy can be managed through the adjustments made under the school’s

medical conditions policy or whether an IHP is required to specify arrangements that reflect the pupil's circumstances.

The school will consider the following principles:

- If the arrangements or support which a pupil requires would be available to any pupil as part of normal policies, an IHP may not be required
- If the pupil only needs non-prescription medication and the school's medical conditions policy would permit them to carry and administer it, an IHP may not be required
- IHPs will be reviewed at least annually and more frequently if the pupil's needs have changed. Where a pupil moves on to a new school or college, their IHP will be shared as part of the transition.

4.4 Allergy and asthma action plans

All pupils who have a known allergy to a food or insect stings should be issued with an appropriate allergy action plan by their healthcare professional.

All pupils who have asthma should be issued with an asthma action plan by their healthcare professional.

The plans include medical and parental consent for staff to administer emergency medicines, including adrenaline for anaphylaxis or reliever inhaler in the event of an asthma attack.

The allergy action plan and/or asthma action plan should be attached to the pupil's IHP. Whenever the allergy action plan is updated, the pupil's IHP should be reviewed to incorporate it.

4.5 Register of pupils with known allergies

- The school maintains a register of pupils who have a known allergy. The register includes:
 - Known allergens and risk factors for anaphylaxis
 - Whether a pupil has been prescribed ADs (and if so, what type and dose)
 - Where a pupil has been prescribed an AD, whether parental consent has been given to administer emergency medication
 - A photograph of each pupil to allow a visual check to be made
- The register is kept in a designated folder which is taken into the dinner hall at lunchtimes so that it is easily accessible to staff in areas where food is served or handled and can be checked quickly by any member of staff as part of initiating an emergency response

5. Assessing risk

The school will conduct a risk assessment for any pupil at risk of anaphylaxis taking part in:

- Lessons such as food technology
- Science experiments involving foods
- Crafts using food packaging
- Off-site events and school trips
- Any other activities involving animals or food, such as animal handling experiences or baking

A risk assessment for any pupil at risk of an allergic reaction will also be carried out where a visitor requires a guide dog.

6. Minimising risk

We take reasonable and practical steps to reduce the risk of exposure to allergens across the school day. The school is nut free, and we remind families of this requirement at the start of each term and throughout the year. Nuts and products containing nuts must not be brought into school in packed lunches, snacks or as food contributions for events such as cake sales. Our catering team is trained in allergen management and the prevention of cross-contamination. We also consider allergy safety when planning curriculum activities, including D&T and science, as well as school trips and other activities outside the classroom.

6.1 Hygiene procedures

- Sharing of food, food containers, and food utensils is not allowed
- Pupils have their own named water bottles, and lunch boxes provided to pupils with food allergies will be clearly labelled with the name of the child for whom they are intended

6.2 Catering

The school is committed to providing safe food options to meet the dietary needs of pupils with allergies.

- Catering staff receive appropriate training and are able to identify pupils with allergies
- The school will engage with caterers to understand the controls in place to ensure that food service complies with relevant requirements
- School menus are available for parents/carers and pupils to view with ingredients clearly labelled, and catering staff are available to discuss the provision of allergy safe meals with parents/carers
- Where changes are made to school menus, we will make sure these comply with legislation, and continue to meet any special dietary needs of pupils
- Food allergen information relating to the 'top 14' allergens is displayed on the packaging of all food products, allowing pupils and staff to make safer choices. Allergen information labelling will follow all that apply to naming the food and listing ingredients, as outlined by the Food Standards Agency (FSA)
- Where food is provided by the school, staff will understand how to read labels for food allergens
- Catering staff follow hygiene and allergy procedures when preparing food to avoid cross-contamination

6.3 Insect bites/stings

When outdoors:

- Keep outdoor areas tidy: Regularly check play areas, gardens and outdoor learning spaces for wasp/bee nests, ant nests and other obvious insect hazards, and arrange appropriate removal by a competent person where necessary.
- Manage food and drink outdoors: Avoid leaving uncovered food and sweet drinks outside. Encourage children to keep food and drinks covered where practicable and clear up spills promptly.

6.4 Animals

- All pupils will always wash hands after interacting with animals to avoid putting pupils with allergies at risk through later contact
- Pupils with animal allergies will not interact with animals

6.5 Visits and trips

- No pupils with allergies will be excluded from taking part
- The school will plan accordingly for all visits and trips, and arrange for the staff members involved to be aware of pupils' allergies and to have received appropriate training
- The school will conduct a risk assessment for any pupil at risk of anaphylaxis taking part in a school trip
- Pupils at risk of anaphylaxis should have their own ADs with them
- Staff trained to administer adrenaline in an emergency will be present on the school trip
- Appropriate measures will be taken in line with the school's AD protocols for off-site events and school trips (see section 8.5)

7. Procedures for handling an allergic reaction

- All staff are trained to recognise the signs of both mild and severe allergic reactions (known as anaphylaxis) and respond appropriately
- Staff are trained in the administration of adrenaline to minimise delays in an emergency
- If the pupil has an allergy action plan, this must be followed
- A spare school AD device will only be used if:
- The pupil does not have a prescribed AD

- The pupil's prescribed AD are not available or misfire

8. Adrenaline devices (ADs)

8.1 Prescribed Adrenaline Devices (ADs)

- Pupils who are prescribed adrenaline devices (ADs) will have access to their medication at all times during the school day and when participating in school activities, including educational visits and trips.
- Pupils will have an additional set of their prescribed ADs kept in school. These devices will remain on the school premises and will not be sent home with pupils at the end of each school day. Parents/carers remain responsible for ensuring that the prescribed ADs supplied to the school are in date and are replaced when required.

Where a pupil cannot keep their ADs with them in the classroom due to their age or other considerations, the devices will be stored:

- In the office on the ground floor
- In the staffroom
- Both of which are more than 5 minutes away from where they may be needed..
- At room temperature, in line with the manufacturer's guidelines, and protected from direct sunlight and extremes of temperature.
- In a location that allows rapid access in an emergency, including during lunch, break times, PE, sports activities and other school activities.
- A copy of the pupil's allergy action plan will be kept alongside their medication, as it includes instructions on how their ADs should be used in an emergency

School trips and educational visits

- When a pupil with a prescribed AD is attending a school trip or educational visit, a designated member of staff will be responsible for carrying the pupil's prescribed ADs for the duration of the trip.
- The designated member of staff will collect the ADs from their usual storage location on the evening before the trip to ensure that they are available and ready for use when required the following day. The member of staff will ensure that the ADs remain readily accessible throughout the trip and will return them to their designated storage location following the trip.

Checking expiry dates

- The school will carry out regular checks of all prescribed ADs held on the premises to ensure that they remain in date and are stored appropriately.
- Where an AD is approaching its expiry date, the school will contact the parent/carer and provide a reminder that replacement devices are required. Parents/carers are responsible for providing replacement ADs before the existing devices expire.
- The school will maintain appropriate records of pupils who have been provided with prescribed ADs and an allergy action plan, including the location of the devices and relevant expiry dates. These records will be reviewed as part of the school's regular medication checks.

8.2 Spare ADs and inhalers

Please note: current regulations only allow schools to purchase adrenaline auto-injectors (AAIs) as spare devices. Non-injectable adrenaline devices (nasal spray) may be prescribed to individuals but cannot currently be stocked as a spare device. If an individual who is prescribed nasal adrenaline suffers anaphylaxis, a school's spare AAIs may be used in an emergency. Schools can purchase an emergency asthma reliever inhaler which can only be used if the pupil's prescribed inhaler is not available and where written consent has been obtained.

The allergy safety lead is responsible for sourcing spare ADs and an emergency asthma reliever inhaler and ensuring they are stored according to the guidance.

- The school purchases spare ADs at Benjamin Chemist on Stoke Newington High Street
- We purchase 4 ADs
- We provide 1x asthma inhaler

The purchased ADs are mixed brand and dosage. This is to ensure the school meets the needs of all the children who require an AD

Spare ADs and asthma relivers will be stored

- In an appropriate central location that is unlocked and accessible to **staff only** at all times
- **No more than** 5 minutes away from where they may be needed
- Kept at room temperature (in line with manufacturer's guidelines), protected from direct sunlight and extremes of temperature

Spare AAls will be kept:

- In pairs, in case a second one is necessary
- Separate from any pupils' prescribed ADs and clearly labelled to avoid confusion

Jane Spanton and Carole Spanton are responsible for:

- Checking monthly that spare ADs [and the emergency asthma reliever inhaler] are present and in date
- Obtaining replacement ADs when the expiry date is near

8.3 Disposal

ADs can only be used once. Once an AD has been used, it will be disposed of in line with the manufacturer's instructions in a sharps bin for collection by the local council

8.4 Using spare ADs in an emergency situation without prior consent

The school do not require consent to have been obtained for spare adrenaline devices to be used in an emergency.

The school will obtain advance consent from parents/carers or pupils for spare adrenaline devices to be used, so that in an emergency, consent can be assumed to be in place.

However, in an emergency situation, anyone may take reasonable action to save a life without checking whether prior consent has been given. This avoids potentially fatal delays in treatment.

8.5 Use of ADs off school premises

When a pupil with a prescribed AD is attending a school trip or educational visit, a designated member of staff will be responsible for carrying the pupil's prescribed ADs for the duration of the trip.

The designated member of staff will collect the ADs from their usual storage location on the evening before the trip to ensure that they are available and ready for use when required the following day. The member of staff will ensure that the ADs remain readily accessible throughout the trip and will return them to their designated storage location following the trip.

9. Serious incidents and 'near misses'

A **serious incident** is any event relating directly to a medical condition (including allergy) in which a pupil, member of staff or visitor with a medical condition or allergy is harmed or is placed at an immediate and significant risk of harm, including situations requiring emergency medication, urgent clinical intervention or attendance by emergency services.

A '**near miss**' is an event relating directly to a medical condition (including allergy) that did not result in harm but had the clear potential to do so – for example, where an error, omission, or system failure could reasonably have led to a serious incident had circumstances been only slightly different.

9.1 Incident recording

The school will record serious incidents and 'near misses' relating to allergy safety as soon as is feasible. The incident will be recorded in the accident book, including the following information:

- Who was affected
- What happened, when and where
- Why the incident occurred (as far as is known)
- How staff and pupils responded and what was done to support the individual
- Whether emergency services were called
- How the incident concluded

The school will approach serious incidents and 'near misses' in a 'no blame' spirit of seeking to learn lessons.

9.2 Incident reporting

The parents/carers of a pupil aged up to 11 should be notified of the incident or 'near miss' as soon as possible.

The school will share the report with the pupil's parents, the pupil or the individual involved.

They will be given the opportunity to discuss what happened and to contribute their views to the consequent lessons learned review. The school will then confirm what we have learnt from the incident and outline any actions we are taking as a result.

In some cases, the impact of exposure to an allergen at school may be delayed and not recognised until the pupil is at home. This means that incident reporting is not limited to staff – the pupil, parents/carers or others (such as healthcare professionals) will need to report to the school if there has been an incident with a delayed reaction.

Staff will always share the incident report with the Headteacher and designated allergy lead, Karen Law. The allergy safety lead will consider whether the allergy safety arrangements in place were appropriate or if changes are needed to this policy and/or the pupil's IHP. Any learning will be shared appropriately with staff so they can act on them and reduce the chance of an incident reoccurring.

The school will also share the report with other agencies in the following circumstances:

- With the Health and Safety Executive (HSE): incidents which arise directly out of the way the school carried out a work activity which results in death or immediate hospitalization. For example, where a pupil has suffered harm after consuming an allergen due to incorrect preparation of food by a member of staff.]

In the event that the incident or 'near miss' was related to the delivery of a care plan or action plan issued by a healthcare professional, the relevant healthcare professional will be notified.

10. Allergy awareness

10.1 Staff training

The school ensures that all staff expected to be present during times when pupils are scheduled to be on site receive allergy awareness training at least annually. New starters will complete this training as part of their induction.

This includes permanent staff, temporary staff, supply teachers, peripatetic staff, agency workers and regular volunteers. It also includes catering staff and others who may oversee pupils at breakfast or after-school clubs. It does not include contractors carrying out work with no pupil-facing role such as builders, electricians or other ad hoc maintenance personnel.

The school has purchased 'training pens' from EpiPen and Jext so staff can practise safely and be familiar with the differences.

The school will conduct allergy safety drills twice yearly, with all staff. This is a simulated case of anaphylaxis to test out how staff respond, without risk to any individual. The results of the drill will be recorded and used to inform the ongoing review of this policy.

Allergy awareness training will ensure that all staff:

- Have an awareness of allergy, the risks it poses, how allergic reactions can occur and how to manage it

- Understand that allergy includes multiple conditions (food allergy, asthma, eczema, hay fever, others), which can co-exist
- Understand the difference between food allergy, coeliac disease and food intolerance
- Know where to find information on allergy triggers
- Can identify the range of symptoms of allergic reactions
- Understand and can recognise anaphylaxis
- Know how to respond in an emergency, including:
 - Calling emergency services and informing parents/carers
 - How to locate and administer emergency medication
 - How to use the medication/device in an emergency
- Understand the impact allergy can have on a pupil's wellbeing
- Understand the school's allergy safety policy
- Know how to check whether an individual is on the record of those with known allergy, and how to use an allergy or asthma action plan
- Understand their responsibilities in reducing the risk of individuals with known allergy coming into contact with their known allergens
- Understand how to report an allergic reaction or case of anaphylaxis (whether an incident or a 'near miss')

Include any specific details about your training offer. The allergy safety policy should set out induction arrangements for new staff, as well as arrangements to ensure supply and cover staff have received allergy awareness training.

10.2 Awareness of allergy safety policy

This allergy safety policy will be published on the school's website and shared with parents/carers at the start of the school year.

All staff should be aware of and understand the policy as part of annual allergy awareness training.

11. Wellbeing

Pupils with allergies may experience anxiety, worry or feelings of difference as a result of managing their allergy in school. They may also be at risk of bullying or social isolation. The school is committed to supporting the mental health, wellbeing and inclusion of pupils with allergies and to ensuring that they feel safe, understood and confident while at school.

Pupils with allergies will have additional support through:

- Pastoral care and appropriate support from staff to promote their wellbeing and confidence.
- Reassurance that appropriate steps are being taken to minimise the risk of exposure to allergens and that robust arrangements are in place to respond appropriately in the event of an allergic reaction or anaphylaxis.
- Allergy lanyards during mealtimes, where appropriate, to provide a clear and reassuring visual reminder to staff and pupils that a child has an allergy and to support safe mealtime arrangements.
- Clear arrangements for other occasions when food is consumed in school, including appropriate labelling of food and communication with staff, to help minimise the risk of accidental exposure.
- Assemblies and classroom learning that promote awareness and understanding of allergies, encourage pupils to respect individual differences and help create an inclusive and supportive school environment.
- Staff will be mindful of the potential emotional impact of managing an allergy and will encourage pupils to participate fully in school life while ensuring that appropriate safety measures remain in place.
- Any instance of bullying, including bullying related to a pupil's allergy, will be addressed promptly and appropriately in line with the school's behaviour and anti-bullying policies.

11.1 Wellbeing support following an incident or 'near miss'

The school recognises that an incident or a 'near miss' is a serious event with a potential impact not only on the pupil but their family, those involved in responding and any witnesses. The school will provide support to those involved.

The school will support staff involved in any incident or 'near miss'.

See section 9 of the policy for more detail on incidents and 'near misses'.

12. Information sharing

Information about an individual's health is considered special category data under UK GDPR. It will therefore be handled in line with our data protection policy.

13. Monitoring arrangements

This policy will be monitored by the allergy safety lead.

It will be reviewed and approved annually by the allergy safety lead, or more frequently if a serious incident or 'near miss' identifies an area for improvement.

14. Links to other policies

This policy links to the following policies and procedures:

- Health and safety policy
- Supporting pupils with medical conditions policy
- School food policy
- Data protection policy
- Behavior policy

The Governing Body will review this policy annually

Policy Agreed: October 2026

Policy Review Date: October 2027
